nodetateardecy . Signing out is allowed only once. I guess the manufacturer knows that I can't make a "real" signature when it comes to some tools. (I also tested the ALBERTS LOGAL alberts easy activator tomtom Review V1.3 and ALBERTS easy activator tomtom V1.3 and all the same message). With the use of a new license (alberts easy activator tomtom. After downloading and installing the new license, ALBERTS LOGAL Activator 1.3 (V0.1.57.17) for TomTom 6.0 works well. And when I start the TomTom software, the following message appears: The manufacturer of the software and tools is Microsoft (Microsof Inc) UPDATE: When I use the old license, I can set the desired distance. However, as I said, this does not work with the new license. A: This is a known issue with the ALBERTS LOGAL TomTom software and is directly related to the TomTom database. In the past this has been solved by downloading the TomTom 6.0 database from their website, extract it in the same folder as your TomTom software and start a new TomTom software installation with the new database. However this is not exactly an option for you as the company at the moment no longer distributes databases or updates/upgrades for their software. Instead you are supposed to obtain the new database for TomTom 6.0 manually, but it can be done within the context of your license: Go to and download the new ALBERTS LOGAL TomTom software version. Inspect the downloaded archive, go to the folder and rename the.zip archive to.zip Unpack the archive in the same folder where your TomTom software resides. Close your TomTom software, enter the startmenu and open the context menu of the TomTom software and select the "View Log" option. In the file list the ALBERTS LOGAL TomTom software is listed with the first file "ALBERTS LOGAL V1.3 for TomTom 6.0.x". Rename the file (ALBERTS LOGAL V1.3 for TomTom 6.0.x) to (ALBERTS LOGAL V1. f678ea99e
